

**The radar innovation with the electronically adjustable double field module**

## Merkur 2

Microwave motion detector  
for automatic doors

**Intelligent, precise, versatile**

■ **Optimal flow of persons:**  
The only unique and homogenous radar field with SMD+ function detects the smallest movements

■ **Versatile usable:**  
Practical adjustments for any type of doors, inside and outside

■ **Short commissioning time:**  
Pre-programmed comfort settings and electronically adjustable dual field planar module

■ **Energy-saving:**  
Awards involuntary openings of the door by means of direction recognition and blanking-out of cross traffic

## Merkur 2

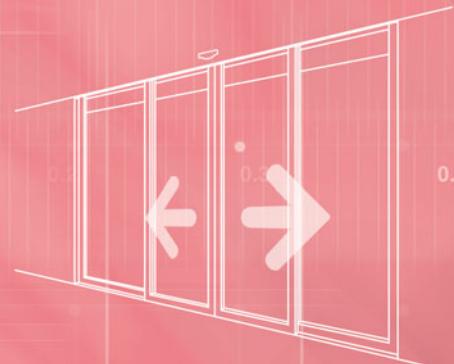

### Microwave motion detector for automatic doors

#### The innovative all-rounder

Thanks to its extremely high versatility, Merkur 2 leads the way and can be used on virtually any type of automatic door. With its totally reliable detection, Merkur 2 provides a smooth flow of people and also ensures savings on energy and costs! The intelligent sensor system has an optional direction recognition and thereby makes sure that the door only opens when people are approaching or leaving. The door closes again immediately afterwards.

#### Hi-tech 'wonder' with dual field planar module

The second generation of Merkur is available with a radar field that is more symmetric and more sharply differentiated than before. Switching between wide or narrow field can be done fully electronically by remote control or by push-buttons on the sensor. Thus, Merkur 2 is adjusted and ready to operate extremely quickly.

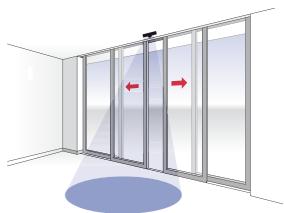

### Your benefits

#### Versatile usable for every situation

- Pre-programmed comfort settings for a rapid commissioning
- The most reliable detection with a clearly differentiated radar field
- Energy-saving by direction recognition
- Avoidance of involuntary door openings by blanking-out of cross
- Electronically switching between a wide and a narrow field
- SMD+ as a new detection field for movements of < 5 cm/s

#### Field characteristics

- Electronic field geometry settings options for a wide and narrow field (via remote control or via buttons at the detector)
- Can even be used with wide passage dimensions and high-level lights
- Mounting height up to 4 m

## Further accessories

High-quality accessories make the innovative Merkur 2 so versatile that it can be used in the most widely differing applications.

### RegloBeam 2 remote control

Using this, the sensor can be rapidly configured and parameters can be individually adjusted for the respective situation

### MIS ceiling installation kit

Using the MIS ceiling installation kit, the sensor can be discretely and almost invisibly built-in to the ceiling

### MCAP rain and snow cover

The MCAP cover for external use protects the sensor against rain and snow

### MCL semicircular adapter

The MCL adapter with its concave back provides a flat surface to mount the sensor on revolving and curved doors

## Reliable in every application

### Situation

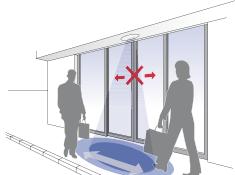

Activation of sliding doors, pedestrians on the pavement

### Solution

- Ensures an optimal flow of people with reliable activation
- Intelligent movement detection: only activated when people directly come towards the door. Ideal for access in passages/on pavements

### Benefits

- No unnecessarily opening/prolonged opening time of the door thanks to direction recognition
- The depth of the field can be reduced to a minimum and still the sensor ensures an optimal flow of people
- Field size up to a width of 5.0 m
- No involuntary opening of the door due to blanking-out of cross traffic/people recognition

### Situation

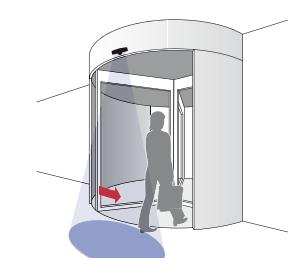

Activation of revolving doors

### Solution

- With a special semicircular adapter, Merkur 2 can also be installed on revolving doors

### Benefits

- Efficient blanking-out of cross traffic
- Small and precisely selectable detection field

### Situation

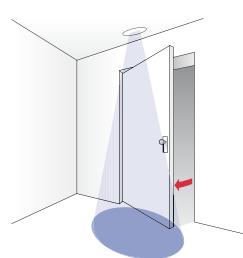

Activation of swing doors

### Solution

- The sensor for automatic doors even in the most confined spaces

### Benefits

- Thanks to the blanking-out of cross traffic, the door leaf is not detected and so the door is not triggered
- Especially suitable for ceiling installation

### Situation

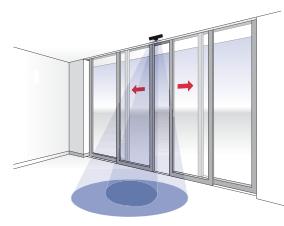

Installation in elderly and disabled homes

### Solution

- Merkur 2 with a specially pre-programmed comfort setting

### Benefits

- Even the very slowest-moving persons (< 5 cm/s) and those in wheelchairs are safely detected with the new SMD+ field
- Almost stationary objects are recognised in the detection field. The door stays open until the person has safely passed through

## Order details

Item no.	Description
<b>Merkur 2 Standard</b>	
<b>219184</b>	<b>Merkur 2</b> Without direction recognition Changeover contact, Plug-in screw terminal
<b>219190</b>	<b>Merkur 2 ES</b> With direction recognition Changeover contact, Plug-in screw terminal
<b>219193</b>	<b>Merkur 2 ES.C</b> With direction recognition Changeover contact, RJ12 socket
<b>Accessories</b>	
<b>292393</b>	Bi-directional remote control RegloBeam 2
<b>213459</b>	Cover Merkur black
<b>213462</b>	Cover Merkur white
<b>247438</b>	Cover Merkur silver
<b>212840</b>	MIS – ceiling installation kit
<b>212837</b>	MCAP – rain and snow cover
<b>212527</b>	MCL 1.0 – semicircular adapter for Merkur 2 TRL 687 black Door diameter 2.0–3.6 m 175 x 40 x 5.4 mm (W x H x T)
<b>212528</b>	MCL 2.0 – semicircular adapter for Merkur 2 TRL 687 black Door diameter 3.6–6.0 m 175 x 40 x 3.7 mm (W x H x T)

## Technical specifications

Technological specifications	
<b>Technology</b>	Double field radar module (24.125 GHz)
<b>Transmitter power</b>	< 20 dBm
<b>Size of narrow field (at 2.2 m)</b>	Min. 0.7 x 0.6 m (W x D) Max. 2.7 x 1.9 m (W x D)
<b>Size of wide field (at 2.2 m)</b>	Min. 1.1 x 0.6 m (W x D) Max. 4.7 x 1.7 m (W x D)
Mechanical specifications	
<b>Material</b>	Cover: PC Base plate: ABS
<b>Dimensions</b>	176 x 62 x 54 mm (W x H x D)
<b>Weight (without cable)</b>	150 g
<b>Types of connections</b>	Plug-in screw terminal or RJ12 plug
General electrical specifications	
<b>Voltage</b>	12–36 VDC 12–28 VAC
<b>Operating current</b>	Approx. 50 mA at 24 VDC, 24 °C
Environmental conditions	
<b>Mounting height</b>	Max. 4.0 m
<b>Type of protection</b>	IP54
<b>Operating temperature</b>	-20 °C up to +60 °C
<b>Humidity</b>	0 – 90 % rel., non-condensing
Standards	
<b>Immissions</b>	EN 61000-6-1 EN 61000-6-2
<b>Emissions</b>	EN 61000-6-3 EN 61000-6-4
Specific specifications for Merkur 2 and Merkur 2 ES	
<b>Output</b>	Potential-free changeover contact 48 VACDC 0.5 A AC / 1 A DC 60 VA / 30 W

### Note

Technical details and recommendations on our products are based upon experience and represent guidelines for the user. Details in brochures and specification sheets do not guarantee any special product features, apart from those which we confirm in individual cases. We reserve the right to make changes as the result of technical developments.

## Additional products

<b>UniScan</b>	Infrared presence detector for automatic swing doors and revolving doors in accordance with EN 16005 and DIN 18650
<b>PrimeFamily A</b>	The complete solution for activating and protecting sliding doors in accordance with EN 16005 and DIN 18650
